Southern Africa has the highest TB ratio in the world.

Southern African Tuberculosis and Health Systems Support (SATBHSS) Project Funding

1.1 Enhancing case detection and treatment success (US$37.52 million)
1.2 Rollout of occupational health services and mining safety standards (US$7.97 million)

Component 1: Innovative Prevention, Detection, and Treatment of TB (US$45.49 million)

Funds received:
- Lesotho: US$ 15 million
- Malawi: US$ 17 million
- Mozambique: US$ 45 million
- Zambia: US$ 45 million

Total SATBHSS project funds: US$ 122 million

Southern Africa has the highest TB burden globally as a result of poor access to TB prevention, care and treatment.
Southern African Tuberculosis and Health Systems Support (SATBHSS) Project

Component 2: Regional Capacity for Disease Surveillance, Diagnostics, and Management of TB and Occupational Lung Diseases (US$43.19 million)

- 2.1 Improving quality and availability of human resources (US$15.24 million)
- 2.2 Strengthening diagnostic capacity and disease surveillance (US$23.02 million)
- 2.3 Strengthening mine health regulation (US$4.93 million)

Component 3: Regional Learning and Innovation, and Project Management (US$33.32 million)

- 3.1 Operational research and knowledge sharing (US$3.61 million)
- 3.2 Centers of excellence in TB and occupational lung disease control (US$5.76 million)
- 3.3 Regional coordination, policy advocacy, and harmonization (US$14.22 million)
- 3.4 Project management (US$9.73 million)
